Workshop Open Science Practices

Part 2

Wrap Up

Wrap Up

Overview

What we covered today

- Open Access
- Open Data and Materials
- Reproducible Analyses
- Exercises

What we covered in the first part of the workshop

- Power
- Data collection
- P-hacking
- Publication Bias
- Preregistration

Wrap Up

5 easy steps to increase your openness

1. Provide **open data, materials, and/or reproducible code** (e.g., OSF/OPARA/ZPID)
 - For the next project: Change the **consent forms** in a way that open data would be possible for that project (see <https://osf.io/mgwk8/wiki/Consent%20form%20templates%20for%20open%20data/>)
 - For the next data analysis: Practice to create scripts for **reproducible data analysis** (e.g., SPSS syntax, R scripts). All analytic steps that lead from raw data to the final results should be reproducible.
 - Publish your first **open data** set: Ensure anonymity, provide a codebook. See here for details: <http://econtent.hogrefe.com/doi/pdf/10.1026/0033-3042/a000341>
 - Upload (stimulus) **material** that you create on an open repository
2. Publish **Open Access**
3. Publish **Preprints**
4. Try to write a **reproducible manuscript** (or a part of it, e.g. with Rmarkdown)
5. Visit **OSIP**

Wrap Up

Open Science practices are like a **buffet**, you can take what you want – not all at once!

Wrap Up

A final group discussion

- Form groups of 2-3
- 5 min. discussion on the question:

What are the **next steps** you could try to implement Open Science elemets in your **research**?

Overview

Time

13:30 – 13:40

13:40 – 14:10

14:10 – 14:50

14:50 – 15:10

15:10 – 15:55

15:55 – 17:25

17:25 – 17:40

17:40 – 17:50

Topic

Welcome

Open Access (Anne)

Open Data and Materials (Anne)

Break

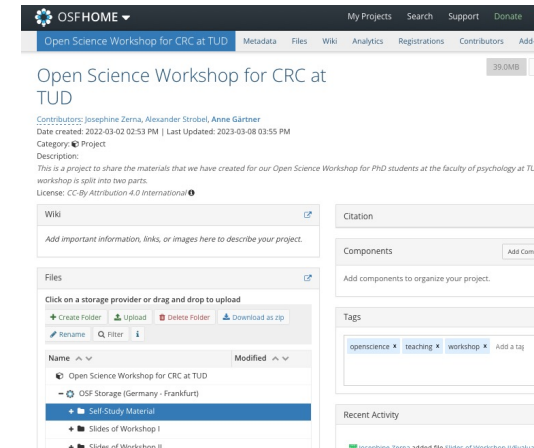

Reproducible Analyses (Alex + Christoph)

Practices (Alex + Christoph)

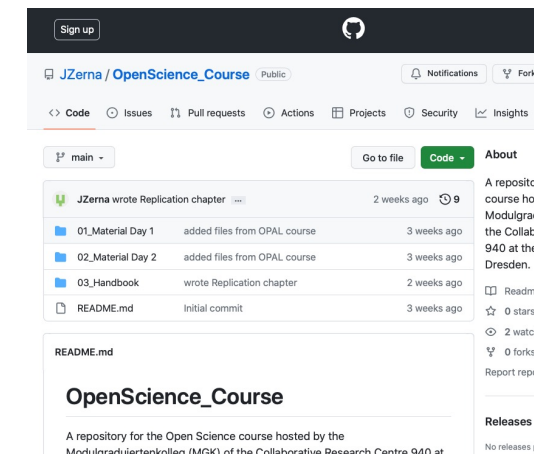

Group Discussion (Anne)
